Dear Dr. Rosenberg,

I am writing to thank you for your referral to the Dog Training Company. Our dog Maddie, now a 1 year old Bichon, was trained using the remote collar technique. She has done extremely well and now is an excellent and well behaved pet. Training with the remote collar has been nothing but positive. Our dog follows commands with ease and we can easily correct undesirable behavior without raising voices or maintaining the dog collared and leashed.

In my opinion, the remote technique is the most humane way to train a dog. Our dog has learned quickly with this method, and she in no way displays any fear of the collar or remote. I would recommend this training to any dog owner.

Sincerely,

Frank J. Trudo, MD
