To whom it may concern,

We are taking this opportunity to advise you of the fine service we and our dog, Liberty, received at the Dog Training Company. After reading a brochure at your office, we decided to call to the trainers and made an appointment to view the premises and training program they would provide. We felt comfortable after our first visit as the staff willingly answered our questions, showed us all the facilities, explained and demonstrated the program, and took a personal profile on our dog. Although we were a bit hesitant because Liberty is very much attached to us, a picky eater, and has never been away for an extended amount of time, we felt the benefits of the training would make the time we shared with her even better.

When we picked up Liberty, we found a happy dog that did eat and we were pleased with the effects of such a short time of training. More importantly, we could see she truly liked the trainer and that a minor health issue was immediately addressed with a visit to your office. We also found that once we were back at home the training regimen was easy to follow and was more effective for Liberty than the previous type of training she had participated in.

We would highly recommend the Dog training Company to interested dog owners as we found the staff knowledgeable, caring, and willing to work with the dogs taking into account their individual needs and personalities.

Sincerely,

A handwritten signature in black ink, appearing to read "Elliott & Sharon", written over a horizontal line.
