Hi Dr. Driben,

I just wanted to let you know how unbelievably appreciative we are of your referral to take Rosie to the Dog Training Company. Susan and Ron were unbelievable. We brought Rosie to them after months of trying to train her with the choke collar (and many dollars later for trainers to teach us the choke collar method) and having absolutely no results.

For Rosie's first year of living with us she was confined to the kitchen because she would otherwise destroy the house. When she was with us in any other room she needed to be on a leash because she was so destructive.

She is now the calmest, sweetest, kindest, most obedient, loveable dog ever! She is allowed free roam of the house, which has made her much happier and us less stressed out. She listens to every command immediately no matter what type of distraction is going on and is happy to do it. There is no more yelling, screaming or frustration, at all.

She destroys nothing, only chews her bones and is so loveable I can't begin to tell you. We've gone back for our follow up classes and Rosie was so excited to see Ron. She did great. Emily, our 11 year old, even worked with her in the class, teaching her some agility commands. She listens to Emily, my 7 year old son Andrew, me and my husband with the same respect. It's incredible.

I was really at the end of my rope with Rosie and am so glad you told us to try the Dog Training Company. It was truly the best money we've ever spent.

I can't thank you or Ron and Susan enough for unleashing Rosie's true potential.

Thanks.
