Dear Dr. Wolf:

We wanted to take a moment and share with you our experience with The Dog Training Company. We recently took our six month old puppies, Yellow Lab Abbie and Chocolate Lab Briscoe, to be trained and are absolutely thrilled with the results.

Abbie and Briscoe were two very loveable, but very rowdy puppies, especially when they were together. They didn't listen to us and were becoming too much to handle. We quickly realized that we couldn't train them on our own. We enlisted the help of Susan Engel and Ron Nober of The Dog Training Company.

We can't say enough about Susan, Ron and their training. Our dogs each went for their five-day training program and came back brand new dogs! They learned nine commands: "sit", "come", "place", "off", "drop it", "leave it", "quiet", "kennel" and "let's go". We were astounded to see them obey each of these commands the first day we picked them up and they have only gotten better since. The remote collar used for training was harmless yet extremely effective for our dogs. Abbie and Briscoe are now polite and controllable, but best of all, they did not lose their spirits. They are still the same very loveable dogs, but now they actually listen to us! And our cat can now live a normal life – she's no longer tormented by her canine siblings!

Susan and Ron are extremely knowledgeable and they love the dogs they train. They answered all of our questions and took great interest in Abbie and Briscoe.! We felt very comfortable entrusting them with our precious pooches.

Possibly there is someone in your practice that could use the assistance of Susan, Ron and The Dog Training Company. We highly recommend them!

*Sincerely,*

Andy, Bridgette,  
Abbie, Briscoe and Molly the Cat Toohey
